

This week, you will create two slightly different versions of last week's sales report project.

First, you will modify the report so that the AMOUNT OF DISCOUNT column reflects discounts only for those customers who ordered a quantity of 5 or more. Make the necessary adjustments to the TAX and GRAND TOTAL formulas if this is needed.

Second, you will copy the data to another area to save time, and once again modify the report so that only one discount column is needed. In other words, you will calculate the discount and subtract it from the original price before displaying it. An example of each version of the report is shown below.

As always, you can use your own data. No special formatting is required this week. Focus on the formulas. Just be sure you have sufficient variety of data to show that your formulas are working correctly.

Sales Report

Discount: 10%
STATE TAX: 8.50%

CUSTOMER NAME	ITEM DESCRIPTION	ITEM PRICE	QTY ORDERED	TOTAL COST	AMOUNT OF DISCOUNT	DISCOUNTED TOTAL	TAX AMOUNT	GRAND TOTAL
DEANNA TROY	BOOTS	\$125.00	3	\$375.00	\$0.00	\$375.00	\$31.88	\$406.88
